

**New Granular Palm Wax Candle Sand Unscented, Just Pour,  
Insert Wick and Light  
500 Gram Bag Burns Approx. 80hours**

New Concept, candle wax with all natural “certified” sustainable palm oil. \*Free of pesticide/herbicide residue \*no animal testing \* no petroleum products \*burns very clean. Each 500-gram bag contains (approx. 80 hours burn time) unscented colored small granular beads making it easy to handle and ready to pour into your container.

Simply fill a container of your choice with the candle sand, cut wick 1” to burn for about 3 hours, position wick in sand so that about ¼” of the wick is showing. Light the wick and enjoy the beautiful ambiance. Once candle goes out on its own or snuffed out make sure the top layer of the melted wax is COMPLETELY dry then simply lift the thin top layer of wax and throw away! Either add more sand or use remaining sand by inserting another wick. Functional and fabulous for weddings, birthdays, party centrepieces, or for your own home decor including downtime tub time. Includes two 8" wicks to be cut to length. Extra wicks available.

**TIP - You may add your favourite essential oils to create a scented candle!**

Make your own DIY, no melt, exceptionally easy to use. Be creative, get the kids involved, mix and match other colors for unique designs. Only ends with your imagination!!!! Turn virtually any suitable container into a candle - from wide glass bowls, plates, tealights to shells. Not meant for narrow jar like burns.

**SAFETY: Open flame, never leave candles unattended, be mindful of children and pets. DO NOT BLOW out flame, use snuffer to extinguish.**
